116TH CONGRESS
1ST SESSION

H. R. _____

To establish an Interagency Working Group on Coastal Blue Carbon, and
for other purposes.

IN THE HOUSE OF REPRESENTATIVES

Ms. BONAMICI introduced the following bill; which was referred to the
Committee on ______________

A BILL

To establish an Interagency Working Group on Coastal Blue Carbon, and for other purposes.

Be it enacted by the Senate and House of Representa-
tives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Blue Carbon for Our
Planet Act”.

SEC. 2. INTERAGENCY WORKING GROUP.

(a) ESTABLISHMENT.—The National Science and
Technology Council Subcommittee on Ocean Science and
Technology shall establish an Interagency Working Group on Coastal Blue Carbon.

(b) PURPOSES.—The Interagency Working Group on Coastal Blue Carbon shall oversee the development of a national map of coastal blue carbon ecosystems, establish national coastal blue carbon ecosystem restoration priorities, assess the biophysical, social, and economic impediments to coastal blue carbon ecosystem restoration, study the effects of climate change, environmental, and human stressors on sequestration rates, and preserve the continuity of coastal blue carbon data.

(c) MEMBERSHIP.—The Interagency Working Group on Coastal Blue Carbon shall be comprised of senior representatives from the National Oceanic and Atmospheric Administration, the Environmental Protection Agency, the National Science Foundation, the National Aeronautics and Space Administration, the United States Geological Survey, the United States Fish and Wildlife Service, the National Park Service, the Bureau of Indian Affairs, the Smithsonian Institution, the Army Corps of Engineers, the Department of Agriculture, the Department of Energy, the Department of Defense, the Department of Transportation, and the Federal Emergency Management Agency.
(d) CHAIR.—The Interagency Working Group shall be chaired by the Administrator.

(e) RESPONSIBILITIES.—The Interagency Working Group shall—

(1) oversee the development, update, and maintenance of a national map and inventory of coastal blue carbon ecosystems, including habitat types with a regional focus in analysis that is usable for local level protection planning and restoration;

(2) develop a strategic assessment of the biophysical, social, statutory, regulatory, and economic impediments to protection and restoration of coastal blue carbon ecosystems;

(3) develop a national strategy for foundational science necessary to study, synthesize, and evaluate the effects of climate change, environmental, and human stressors on sequestration rates and capabilities of coastal blue carbon ecosystems protection;

(4) establish national coastal blue carbon ecosystem protection and restoration priorities, including an assessment of current Federal funding being used for restoration efforts; and

(5) ensure the continuity, use, and interoperability of data assets through the Smithsonian Envi-
(f) REPORTS TO CONGRESS.—

(1) IN GENERAL.—Not later than one year after the date of the enactment of this Act, the Interagency Working Group shall provide to the Committee on Science, Space, and Technology of the House of Representatives, the Committee on Natural Resources of the House of Representatives, and the Committee on Commerce, Science, and Transportation of the Senate a report containing the following:

(A) A summary of federally funded coastal blue carbon ecosystem research, monitoring, preservation, and restoration activities, including the budget for each of these activities and describe the progress in advancing the national priorities established in section 4(a)(4)(A).

(B) An assessment of biophysical, social, and economic impediments to coastal blue carbon ecosystem restoration.

(2) STRATEGIC PLAN.—

(A) IN GENERAL.—The Interagency Working group shall create a strategic plan for Federal investments in basic research, development,
demonstration, long-term monitoring and stewardship, and deployment of coastal blue carbon ecosystem projects for the 5-year period beginning at the start of the first fiscal year after the date on which the budget assessment is submitted under paragraph (1). The plan shall include an assessment of the use of existing Federal programs to protect and preserve coastal blue carbon ecosystems.

(B) TIMING.—The Interagency Working Group shall—

(i) submit the strategic plan under paragraph (A) to the Committee on Science, Space, and Technology of the House of Representatives, the Committee on Natural Resources of the House of Representatives, and the Committee on Commerce, Science, and Transportation of the Senate on a date that is not later than one year after the enactment of this Act and not earlier than the date on which the report under paragraph (1) is submitted to such committees of Congress;
(ii) submit a revised version of such plan not less than quinquennially thereafter.

(C) Federal register.—Not later than 90 days before the strategic plan under this paragraph, or any revision thereof, is submitted under subparagraph (B), the Interagency Working Group shall publish such plan in the Federal Register and provide an opportunity for submission of public comments for a period of not less than 60 days.

SEC. 3. NATIONAL MAP OF COASTAL BLUE CARBON ECOSYSTEMS.

(a) National map.—The Interagency Working Group shall—

   (1) produce, update, and maintain a national level map and inventory of coastal blue carbon ecosystems, including—

   (A) the types of habitats and species in the ecosystem;

   (B) the condition of such habitats including whether a habitat is degraded, drained, eutrophic, or tidally restricted;

   (C) the size of the ecosystem;

   (D) the salinity boundaries;
7

(E) the tidal boundaries;

(F) an assessment of carbon sequestration potential, methane production, and net greenhouse gas reductions;

(G) an assessment of cobenefits of ecosystem and carbon sequestration;

(H) the potential for landward migration as a result of sea level rise;

(I) any upstream restrictions detrimental to the watershed process and conditions such as dams, dikes, and levees;

(J) the conversion of coastal blue carbon ecosystems to other land uses and the cause of such conversion; and

(K) a depiction of the effects of climate change, including sea level rise, environmental stressors, and human stressors on the sequestration rate, carbon storage, and potential of coastal blue carbon ecosystems

(2) in carrying out paragraph (1)—

(A) incorporate, to the extent possible, existing data collected through federally funded research and by a Federal agency, State agency, local agency, Tribe, including data collected from the National Oceanic and Atmospheric
Administration Coastal Change Analysis Program, U.S. Fish and Wildlife Service National Wetlands Inventory, United States Geological Survey LandCarbon program, and Department of Agriculture National Coastal Blue Carbon Assessment; and

(B) engage regional technical experts in order to accurately account for regional differences in coastal blue carbon ecosystems.

(b) USE.—The Interagency Working Group shall use the national map and inventory—

(1) to assess the carbon sequestration potential of different coastal blue carbon habitats, and account for any regional differences;

(2) to assess and quantify emissions from degraded and destroyed coastal blue carbon ecosystems;

(3) to develop regional assessments and to provide technical assistance to regional, State, Tribal, and local government agencies, and regional information coordination entities as defined in section 123030(6) of the Integrated Coastal and Ocean Observation System Act (33 U.S.C. 3602);

(4) to assess degraded coastal blue carbon ecosystems and their potential for restoration, including
developing scenario modeling to identify vulnerable land areas where management, protection, and restoration efforts should be focused; and

(5) produce future predictions of coastal blue carbon ecosystems and carbon sequestration rates in the context of climate change, environmental stressors, and human stressors.

SEC. 4. RESTORATION AND PROTECTIONS FOR EXISTING COASTAL BLUE CARBON ECOSYSTEMS.

(a) IN GENERAL.—The Administrator shall—

(1) lead the Interagency Working Group in implementing the strategic plan under section 2(e)(2);

(2) coordinate monitoring and research efforts among Federal agencies in cooperation with State, local, and Tribal government and international partners and nongovernmental organizations;

(3) assess the feasibility and potential of establishing a national goal of conserving at least 30 percent of the ocean and coastal blue carbon ecosystems within the territory of the United States by 2030, including the effects of climate change and sea level rise on such goal, and as appropriate setting targets for restoration of degraded coastal blue carbon ecosystems;
(4) in coordination with the Interagency Working Group and as informed by the report under section 2(e) on current Federal expenditures on coastal blue carbon ecosystem restoration, identify—

(A) national coastal blue carbon ecosystem protection and restoration priorities that would produce the highest rate of carbon sequestration and greatest ecosystem benefits such as flood protection, soil and beach retention, erosion reduction, biodiversity, water purification, and nutrient cycling in the context of other environmental stressors and climate change; and

(B) ways to improve coordination and to prevent unnecessary duplication of effort among Federal agencies and departments with respect to research on coastal blue carbon ecosystems through existing and new coastal management networks; and

(5) in coordination with State, local, and Tribal governments and coastal stakeholders, develop integrated pilot programs to restore degraded coastal blue carbon ecosystems in accordance with subsection (b).
(b) INTEGRATED PILOT PROGRAMS TO RESTORE DE-
GRADED COASTAL BLUE CARBON ECOSYSTEMS.—In car-
rying out subsection (a)(5), the Administrator shall—

(1) establish integrated pilot programs that de-
velop best management practices, including design
criteria and performance functions for coastal blue
carbon ecosystem restoration, nature-based adapta-
tion strategies, restoration areas that intersect with
the built environments as green-gray infrastructure
projects, management practices for landward pro-
gression or migration of coastal blue carbon eco-
systems, and identify potential barriers to restora-
tion efforts;

(2) ensure that the pilot programs cover geo-
graphically and ecologically diverse locations with
significant ecological, economic, and social benefits,
such as flood protection, soil and beach retention,
erosion reduction, biodiversity, water purification,
and nutrient cycling to reduce hypoxic conditions,
and maximum potential for greenhouse gas emission
reduction;

(3) establish a procedure for reviewing applica-
tions for the pilot program;

(4) ensure, through consultation with the Inter-
agency Working Group, that the goals and metrics
for the pilot programs are communicated to the appropriate State, Tribe, and local governments, and
to the general public; and

(5) coordinate with relevant Federal agencies
on the Interagency Working Group to prevent un-
necessary duplication of effort among Federal agen-
cies and departments with respect to restoration programs.

SEC. 5. COASTAL CARBON DATA CLEARINGHOUSE.

(a) In General.—The Secretary of the Smithso-
nian, in coordination with the Administrator and members
of the Interagency Working Group, shall provide for the
long-term stewardship of, and access to, data relating to
coastal blue carbon ecosystems and national mapping, by
supporting the maintenance of the Coastal Carbon Data
Clearinghouse.

(b) Coastal Carbon Data Clearinghouse Du-
ties.—Acting through the Coastal Carbon Data Clearing-
house, the Secretary of the Smithsonian in coordination
with the Administrator and members of the Interagency
Working Group shall process, store, archive, provide ac-
cess to, and incorporate to the extent possible, all data
collected through federally funded research by a Federal
agency, State, local agency, Tribe, academic scientist, or
any other relevant entity.
(c) **GLOBAL AND NATIONAL DATA ASSETS.**—The Secretary of the Smithsonian in coordination with the Administrator and members of the Interagency Working Group shall ensure that existing global and national data assets are incorporated into the Coastal Carbon Data Clearinghouse to the greatest extent possible.

(d) **ESTABLISHMENT OF STANDARDS, PROTOCOLS, AND PROCEDURES.**—The Secretary of the Smithsonian in coordination with the Administrator and members of the Interagency Working Group, shall establish standards, protocols, and procedures for the processing, storing, archiving, and providing access to data in the Coastal Carbon Data Clearinghouse and best practices for sharing such data with State, local, and Tribal governments, coastal stakeholders, non-Federal resource managers, and academia. The Administrator shall work to disseminate such data to the greatest extent practicable.

(e) **DIGITAL TOOLS AND RESOURCES.**—The Secretary of the Smithsonian, in coordination with the Administrator and members of the Interagency Working Group, shall develop digital tools and resources to support the public use of the Coastal Carbon Data Clearinghouse.
SEC. 6. NAS ASSESSMENT OF CONTAINMENT OF CARBON DIOXIDE IN DEEP SEAFLOOR ENVIRONMENT.

Not later than 90 days after the date of the enactment of this Act, the Administrator shall seek to enter into an agreement with the National Academy of Sciences to conduct a comprehensive assessment on the long-term effects of containment of carbon dioxide in a deep seafloor environment on marine ecosystems and the integrity of existing storage technologies.

SEC. 7. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the National Oceanic and Atmospheric Administration to carry out this Act $15,000,000 for each of the fiscal years 2021 through 2025.

SEC. 8. DEFINITIONS.

In this Act:

(1) Administrator.—The term “Administrator” means the Under Secretary of Commerce for Oceans and Atmosphere in the Under Secretary’s capacity as the Administrator of the National Oceanic and Atmospheric Administration.

(2) Coastal blue carbon ecosystem.—The term “coastal blue carbon ecosystem” refers to vegetated coastal habitats including mangroves, tidal marshes, seagrasses, kelp forests, and other tidal or salt-water wetlands, and their ability to sequester
carbon from the atmosphere, accumulate it in bio-
mass for years to decades, and store it in soils for
centuries to millennia. Coastal blue carbon eco-
systems include both autochthonous carbon and
allochthonous carbon.

(3) **STATE.**—The term “State” means each
State of the United States, the District of Columbia,
the Commonwealth of Puerto Rico, American
Samoa, Guam, the Commonwealth of the Northern
Mariana Islands, the Virgin Islands of the United
States, and any other territory or possession of the
United States.
